Chet Davidson
Front-end Developer

Profile

My name's Chet and I'm a front-end developer with a passion for creating beautiful, modern, and accessible user interfaces on the web. I'm proficient in all things JavaScript with React being my weapon of choice for delivering dynamic experiences to users.

I'm a hard worker and I'm dedicated to creating excellent software whether I'm on my own or in a team, and love to learn and share what I've learned with the rest of my team. I'm an avid Lord of the Rings fan committed to making the web more accessible and delightful with every line of code I write.

Experience

Hnry   November 2019 - present
Front-end Developer

As the only front-end dev in a growing team of back-enders, I led the effort in breathing life into the Hnry platform with animations, custom dynamic inputs, and introducing accessible web practices. I championed the development of a design system to ensure consistency in our user interfaces.

Working with a mainly Rails application supported by various AWS technologies, I learned a lot about the full application stack and what goes in to a live, fast-growing application. I additionally took the lead dev role in maintaining the Hnry website built with Jekyll, and contributed to suggesting new designs by becoming skilled in Figma and Framer.

`React` `Rails` `SCSS` `JavaScript` `Jekyll` `Gatsby`

Epi-interactive   July 2018 - November 2019
Full-stack Developer

My primary role was web development using R and the Shiny framework to create engaging data visualisation dashboards, as well as using my extensive core web skills to develop eLearning modules and static sites for local and international clients.

As an excellent communicator and confident speaker, I would often play a further role with eLearning by creating and presenting content in webinars and workshops to groups of varying sizes and skill levels.

`R` `Shiny` `HTML` `CSS` `Postgres`

Education

Victoria University of Wellington
BSc Computer Science
2015 - 2018

Upper Hutt College
